

HARDWARE INSPECTION CHECKLIST

HOME LAB 01 / BIOS-UEFI + OPERATING SYSTEM INVENTORY / PRINTABLE WORKSHEET

Date: _____

Device alias: _____

Environment: ☐ PC ☐ VM guest

OS / Hypervisor: _____

1 Firmware / hardware

☐ Confirm physical PC vs VM guest, permission, OS and inspection date

☐ Review BIOS/UEFI information screen or virtual machine hardware settings

☐ Record manufacturer/model or hypervisor/VM platform

☐ Record CPU model, cores or vCPU allocation

☐ Record installed/allocated memory (GB or GiB) and storage capacities

☐ Record BIOS/UEFI vendor, version and date; note firmware boot mode

☐ Inspect cables, vents and LEDs externally, if a physical device and safe

2 OS inventory

☐ Identify OS version and CPU with msinfo32 / PowerShell or lscpu

☐ Record OS-visible memory and disks; note reporting units

☐ Identify firmware version and boot mode as visible to operating system

☐ Check Device Manager warnings or Linux hardware-related errors

3 Validation and evidence

☐ Compare firmware or VM allocation to OS-visible CPU, RAM and storage

☐ Document differences, their likely reasons, and any follow-up action

☐ Save a report and redacted evidence; check for sensitive identifiers

Summary / findings: _____

Action / follow-up: _____

Status: ☐ Completed ☐ In progress ☐ Blocked Evidence reviewed for privacy: ☐ Yes

Do not modify firmware settings or publish serial numbers, hostnames, addresses, recovery keys or private screenshots.
